October 11th 2021

**Sahana
Foundation**

Agenda

- Background
 - Speakers
 - Sahana
- Replacing DMIS
- SAFIRE: First Response
- SAMBRO: Alerting

Fran Boon

- Worked in Humanitarian Response in 30 countries for UN, Red Cross, Oxfam and other NGOs
- Headquarters, Regional & Field level experience
- Project Lead for Sahana Eden
- Mapping/GIS specialist

Nuwan Waidyanatha

Operations Research Analyst, Computer Engineer, and Emergency Communication Systems Expert

Over 17+ years experience in designing, building, implementing, and evaluating ICT-enable community-based and national emergency communication and telecom resiliency.

Developed and integrated enterprise-level mission-critical algorithms, databases, software, and hardware systems for managing operations and decision-support.

Published several book chapters, journal articles, conference proceedings and contributed to international technical committees and forums.

Led multitude of multi-sector, multi-stakeholder, and multi-disciplinary projects; completed over 35 research and implementation projects spanning across 12 countries

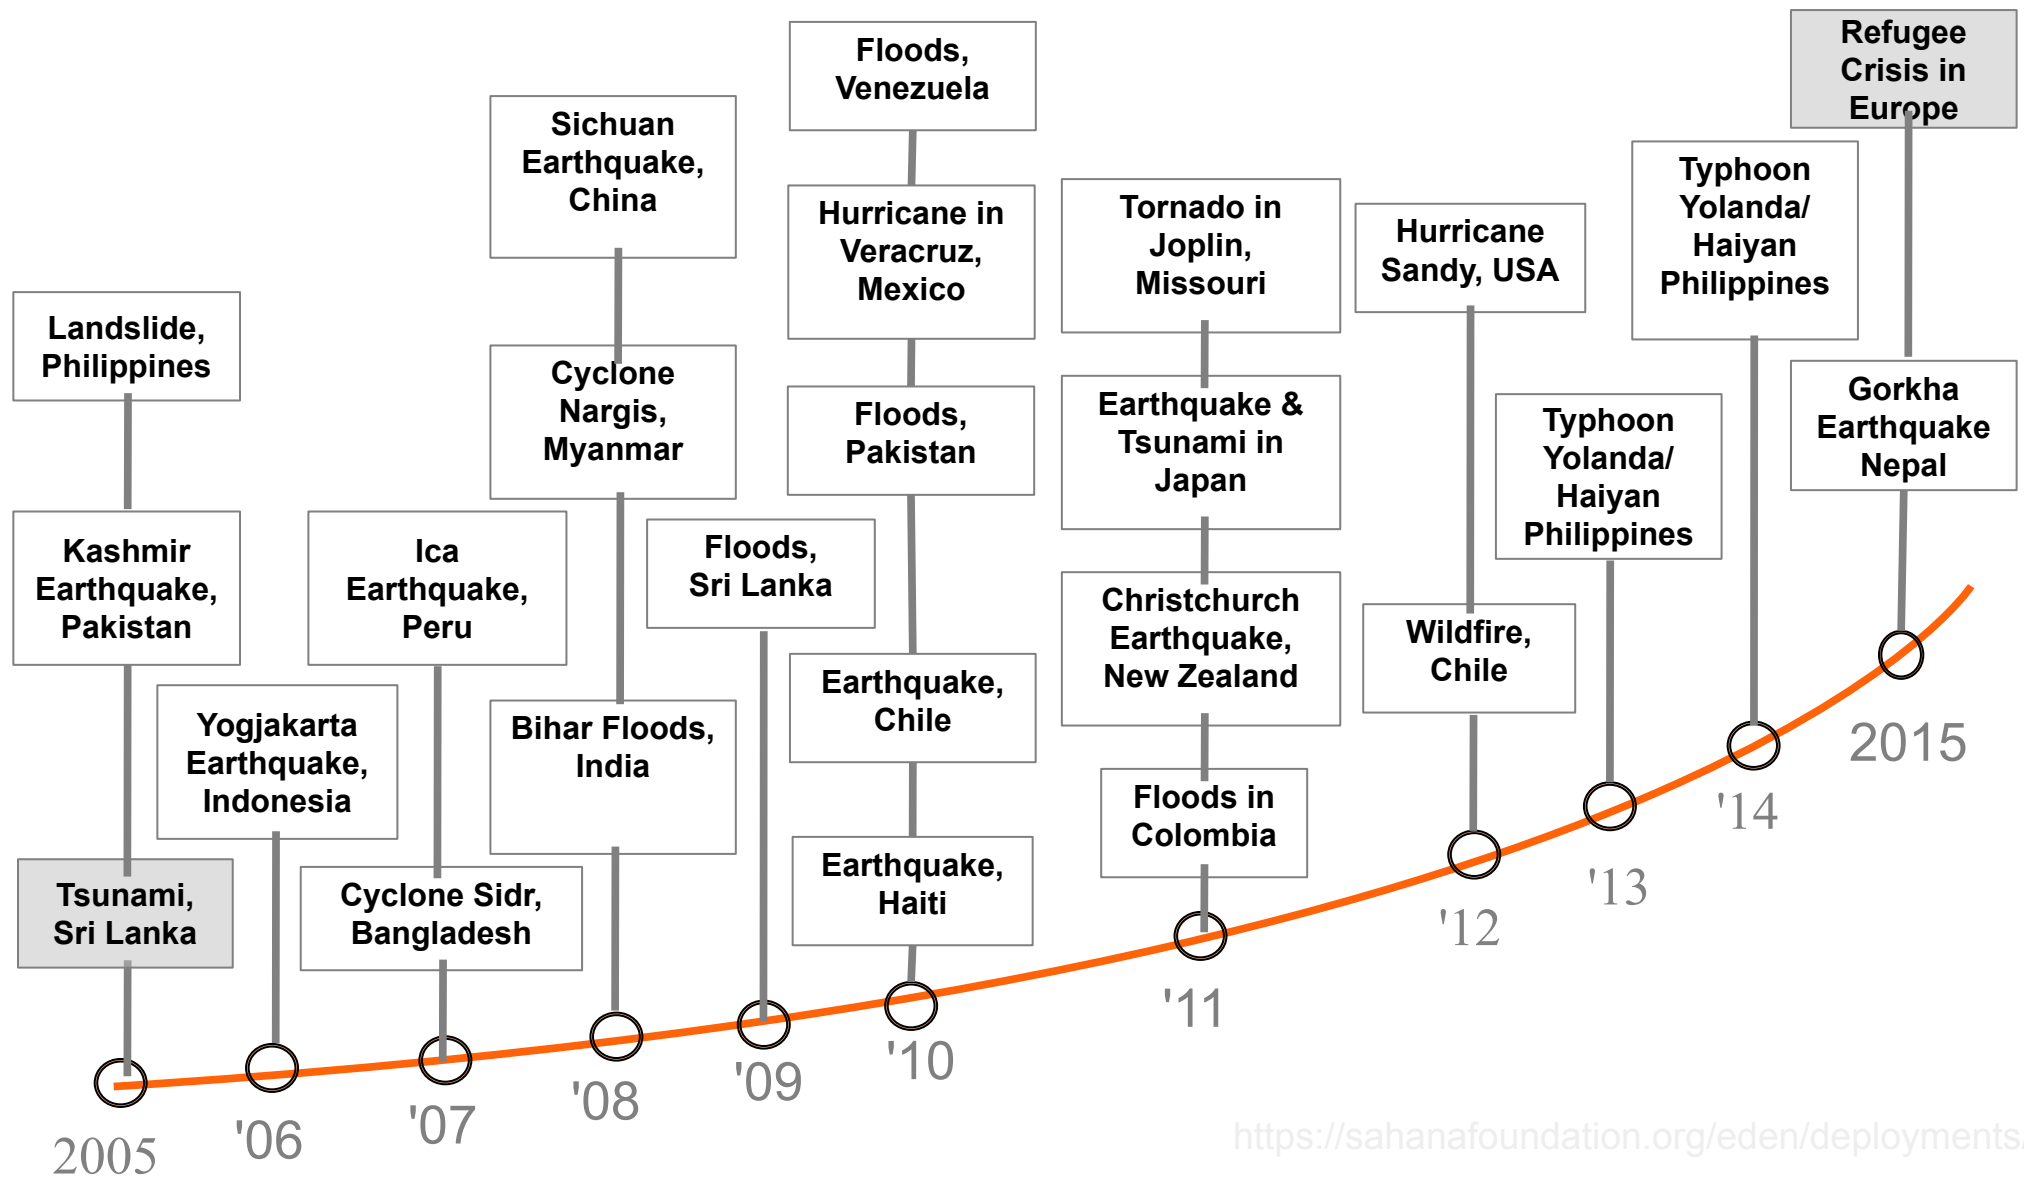

Sahana

- Indian Ocean Tsunami in Sri Lanka (2004)
 - Sahana is the Sinhalese word for Relief
- Since used in over 50 countries
- Stewarded by the Sahana Software Foundation
 - A 501(c)(3) non-profit organization

Emergency Deployments

What or Who is Sahana?

- A Free, Open Source Humanitarian software platform.
 - No licensing fees
 - No restrictions to use (MIT license)
- A Global Community of Disaster Management professionals

Mission:

To **save lives** by providing **information management solutions** that enable organizations and communities to better prepare for and respond to disasters.

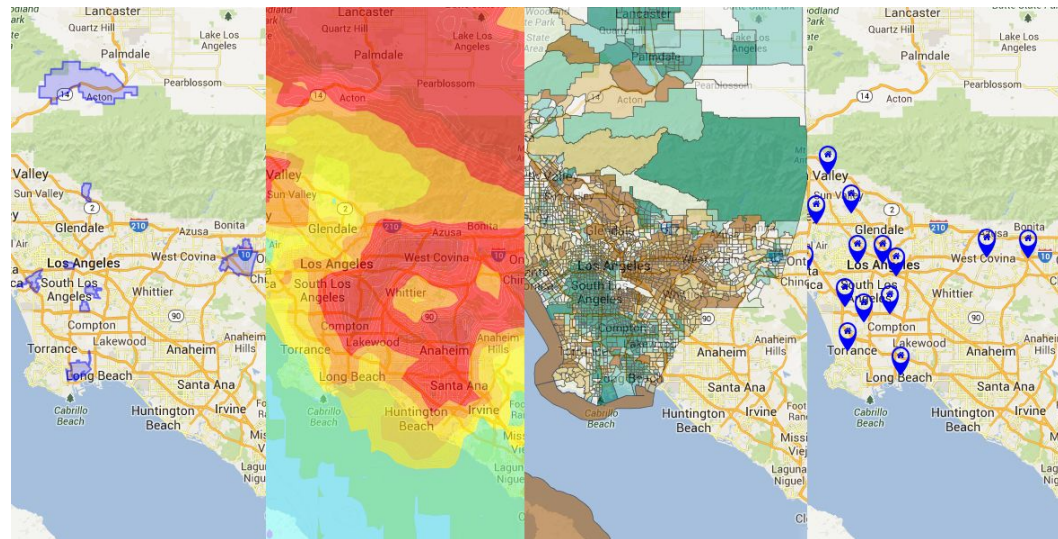

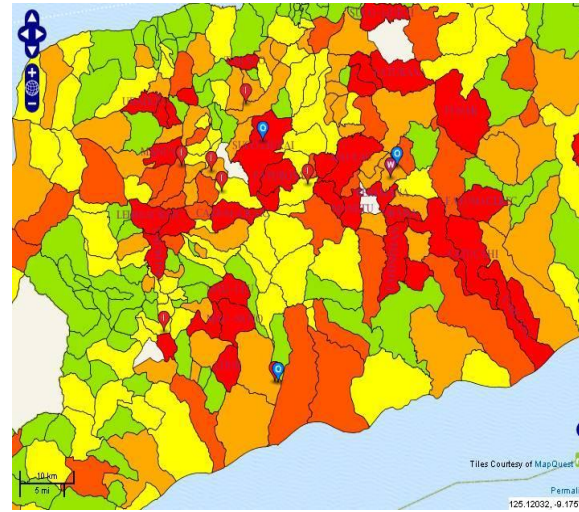

More than 75 deployments over more than 50 countries around the world.

Sahana Features

- Access Control
 - Hierarchical Realms
- Integration
 - Import/Export
 - Synchronisation
 - Open Standards
- Data Protection
 - Consent Tracking
 - Anonymisation
- Customisable
 - Rapid Application Development

WHY THIS PORTAL?

- Share information on implementation of DRR: Who? What? Where?
- Collectively identify gaps, improve planning and programming on DRR
- Identify areas of cooperation on implementation of DRR

WHAT CAN WE GET FROM THIS PORTAL?

- List of completed and ongoing DRR projects - by country, hazards, themes, partners and donors.
- List of planned/proposed projects - better planning of future projects.
- Quick analysis - on number and types of completed and ongoing DRR projects
- Generate customised graphs and maps.
- Know more on the DRR frameworks/action plans guiding the region - identify priority areas for providing support and implementation.
- List of organisations implementing DRR projects at regional level.
- Archive of periodic meetings of regional DRR mechanisms.

HOW WOULD THIS INFORMATION HELP?

National Government

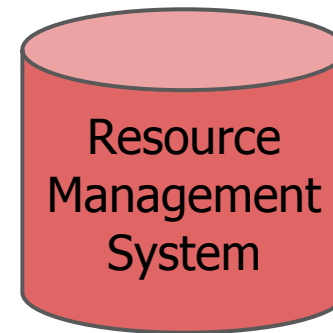

Currently the DRR Projects Portal has information on:

Relief Goods Inventory & Monitoring System (RGIMS)

*Department of Social Welfare and
Development, Philippines*

[Home](#)[Warehouse](#)[Requests](#)[Map](#)[more](#)[Administration](#)[admin@example.com](#)[Help](#)

Relief Goods Inventory & Monitoring System

[Request](#)[Send](#)[Receive](#)

Manage Your Warehouse

[Go](#)

RGIMS aims to provide a reliable and accurate inventory control of the UNWFP and DSWD logistics management systems of tracking, monitoring and reporting of relief goods intake, warehousing and outflow of donations.

For more details on the RGIMS system please contact DSWD-NROC Office.

Map

DSWD Background

- In disaster response the World Food Programme (WFP) distributes food through the Department of Social Welfare and Development (DSWD)
- WFP wanted to build DSWD's capacity to manage warehouse inventory
- WFP selected Sahana to provide a Relief Goods and Inventory Management System (RGIMS)

Typhoon Haiyan

- DSWD were the biggest provider of relief goods after Typhoon Haiyan - which was managed using Sahana
- RGIMS was used to manage relief goods at 19 Warehouses
- When changes were requested the volunteer Sahana community provided these in < 24 hours

Disaster Risk Management System

*National Disaster Operation Center
Timor-Leste*

Timor-Leste Disaster Information System

Improving disaster prevention, preparedness and response in Timor-Leste.

Prevent

Share information to coordinate, cooperate, and collaborate with stakeholders in Timor-Leste to avoid potential adverse impacts of disasters through advanced actions

Prepare

Share information, knowledge and capacities to effectively anticipate, respond to, and recover from, the impacts of likely, imminent or current hazard events in Timor-Leste

Respond

Coordinate the provision of emergency services and assistance during or after a disaster in order to save lives, reduce health impacts, ensure public safety and meet the needs of the people affected

Situational Awareness

SAMBRO & SAFIRE

Situational Awareness

Endsley's model

Got a “heavy rain” alert

I live by the river

Observe the situation

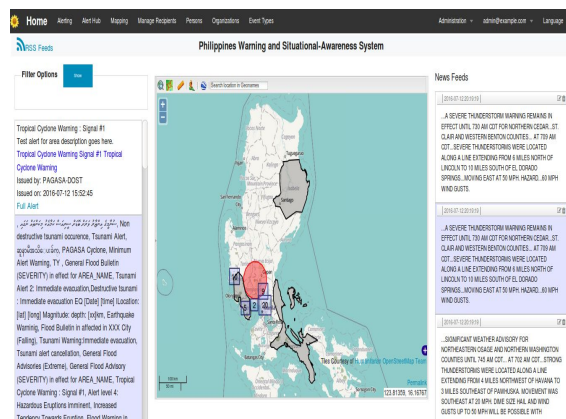

1m below spill level

Let's evacuate

Perception of the elements in an environment within a volume of time and space

Sense-making of the immediate events and the ongoing situation that is actually occurring and deliberating

critique—explore—compare—adapt (CECA) loop model, is a notion of the “vision” or “conceptual model” that contains not only a plan, but also indicators to monitor the plan as it unfolds.

1. Improves information sharing among first-responders
2. Immediate collaboration in response and mitigation
3. Creates connected agencies for public safety
4. Manages resource more efficiently and cost effectively
5. **Saving lives and livelihoods**

SAFIRE

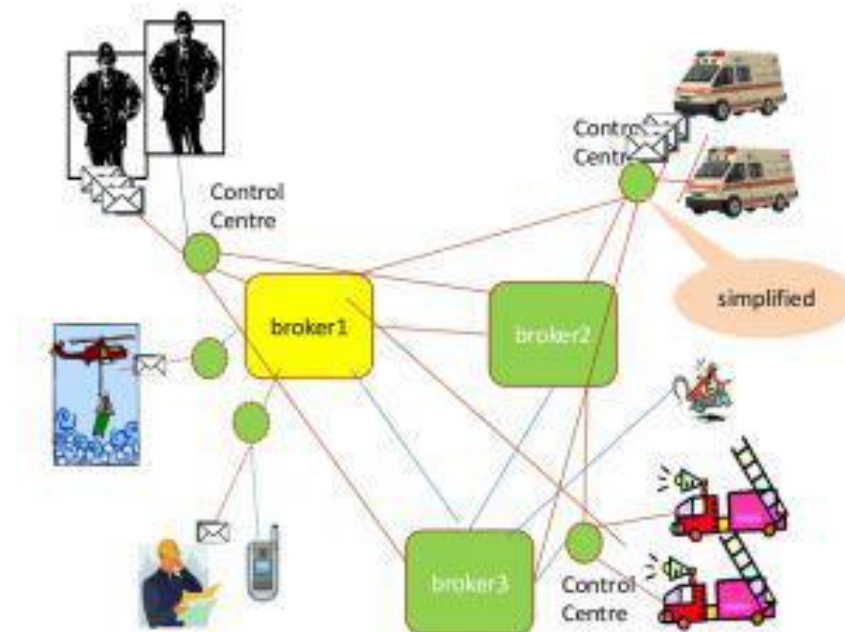

Sahana First Response

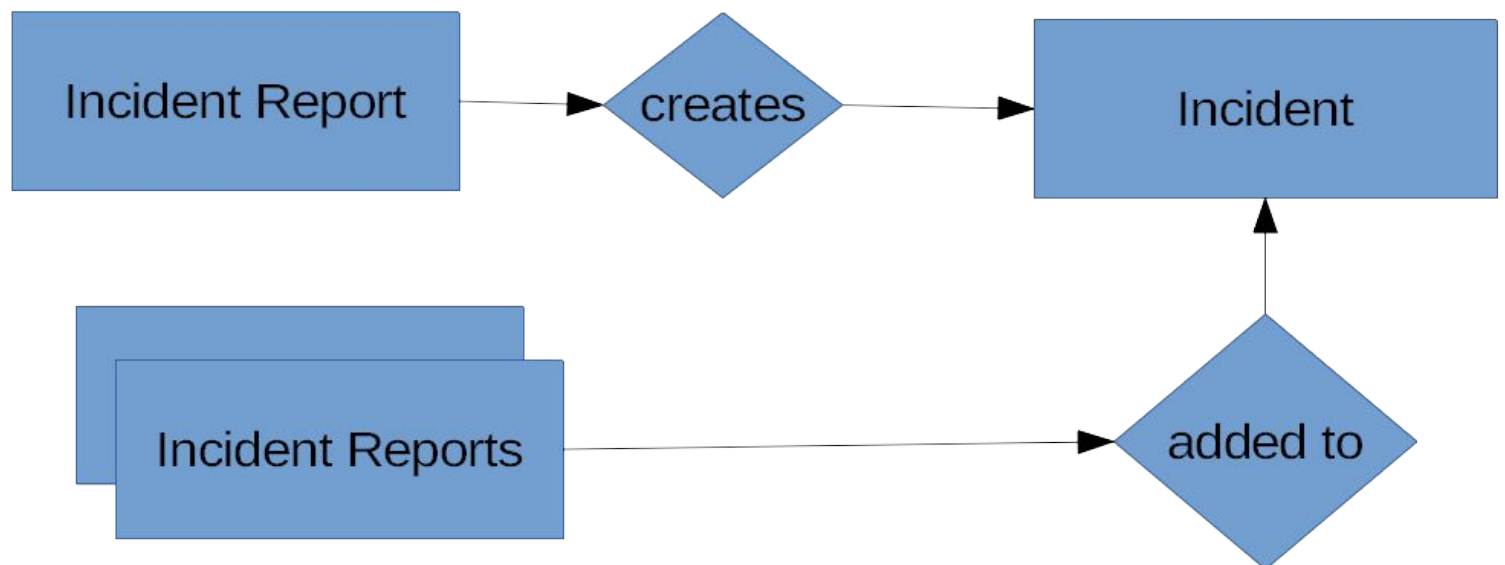

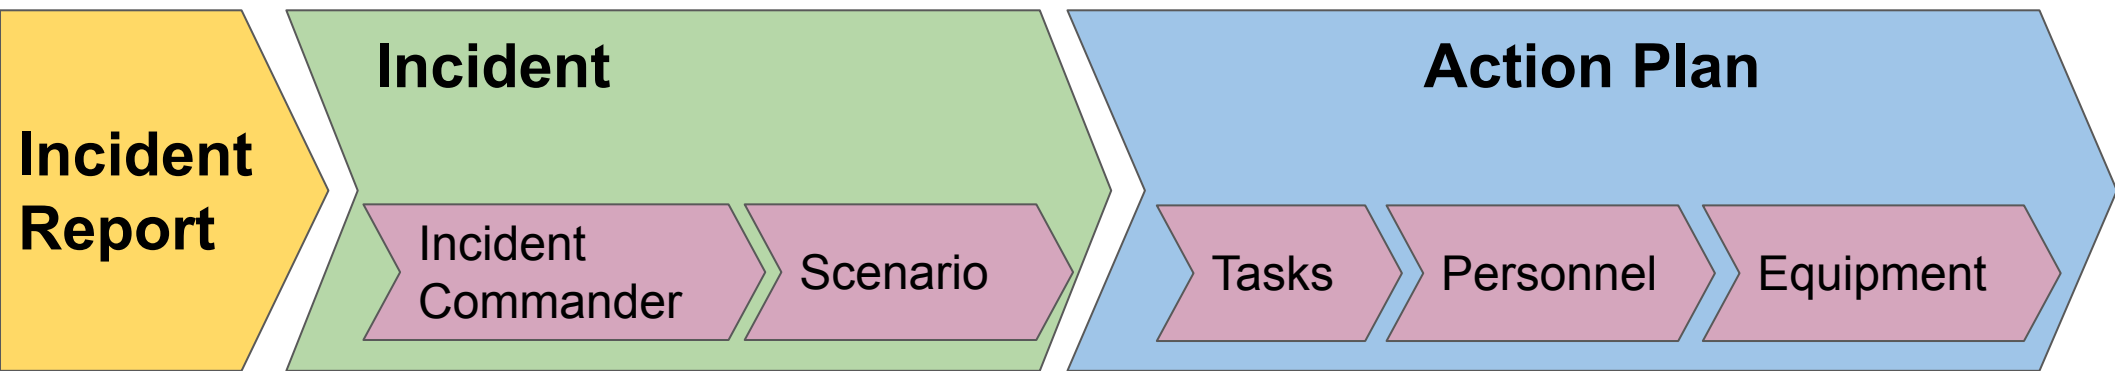

Typical Emergency Operation Center Functions

1) Call Center logs the Incident Reports received by the Public or the First-Responder through Voice and Data channels

2) EOC assess the situation, dispatch emergency services, and coordinate plans, operations, and logistics

3) SITREPs and real-time common operating picture – WHO is doing WHAT, WHERE, & WHEN, shared with stakeholders

SAFIRE Projects

- Urgences-Sante, Canada

- Ambulance Dispatch

- Seychelles

- Department of Risk Disaster Management NEOC
- Prototype built
- Positive Evaluations

- Albania

- National Agency for Civil Protection
- Interest from seeing Sahana used by Italian Civil Defence

DEMO

SAMBRO

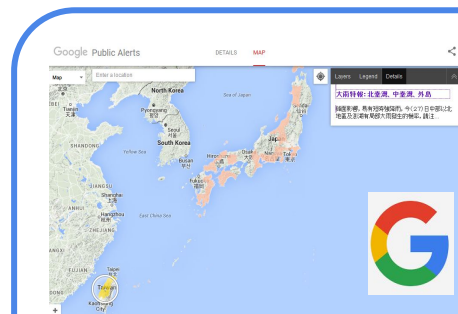

*Sahana Alerting
and Messaging Broker*

SAMBRO Key Components

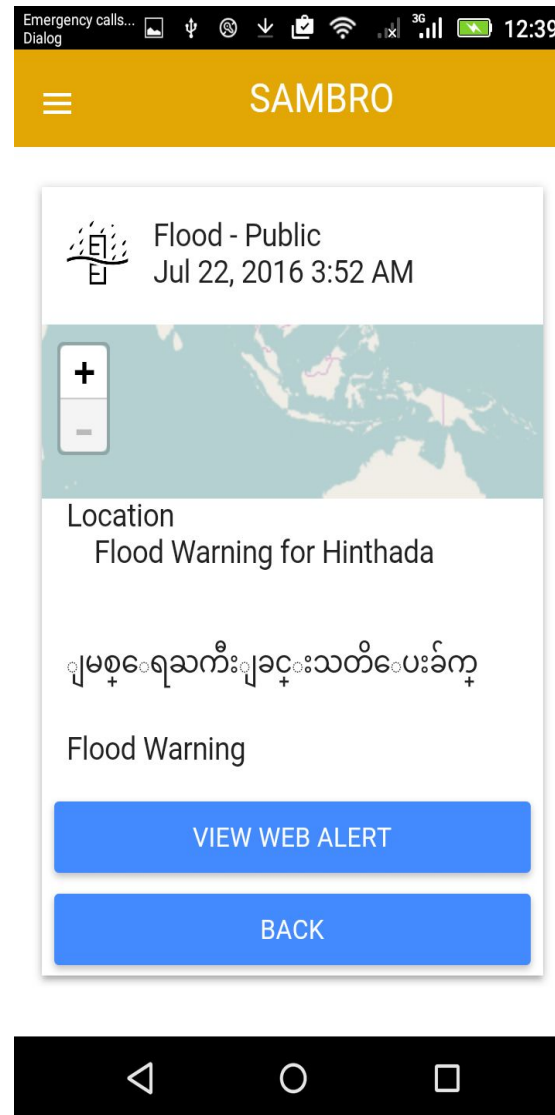

SAMBRO Server (Browser App) and Mobile APP talk to each other through **RESTful APIs**

Google, IFRC, FIA, Accuweather and any other CAP Alert Hubs can talk to SAMBRO through **RSS**

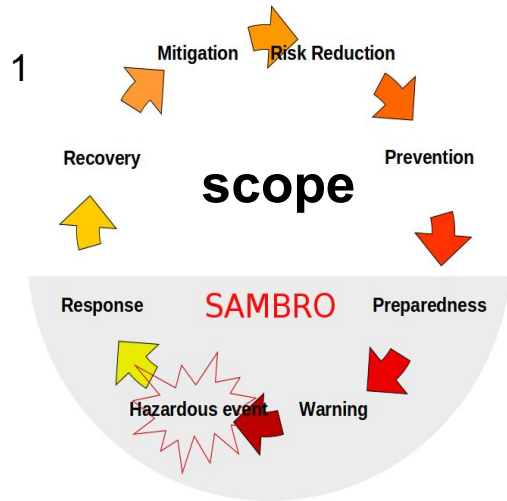

Mobile App

1. Designed for local alerting authorities to issue CAP-alerts for village, townships, Islands
2. GCM push serves as a wakeup function with a Siren (limited e.g. China)
3. Requires a data connection but future versions will make use of SMS as a data transport

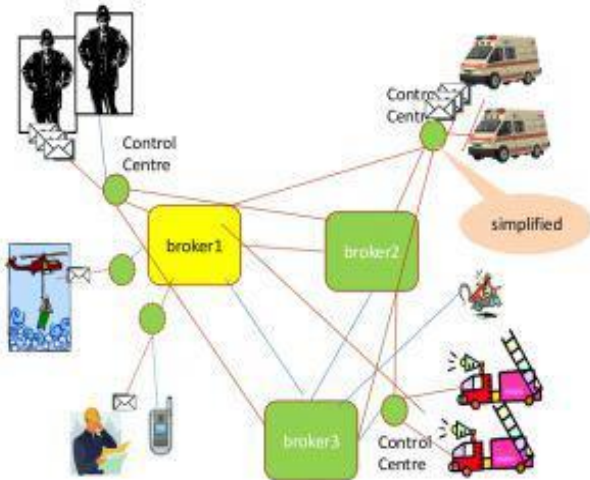

SAMBRO

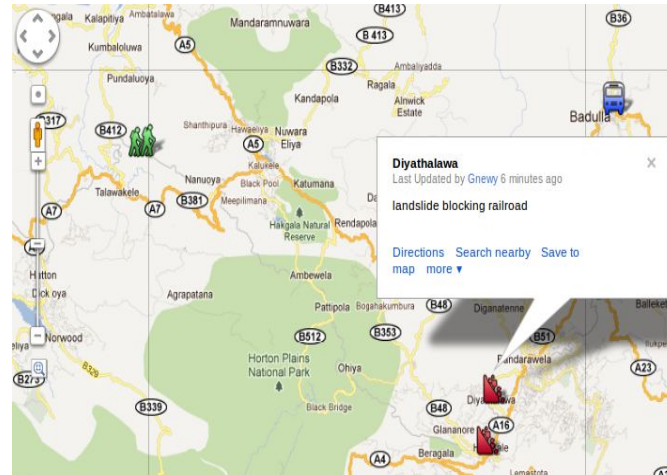

2 function

3 architecture

4 keep it Simple

SAMBRO Principles

1. Application scope lies within disaster **response** and preparedness
2. Key function is to bring **efficiency** to Alerting / Warning dissemination
3. Apply a Messaging Broker architecture for improved **interconnection** and scalability
4. Keep it simple with Map-based visualization and interaction for improved **situational-awareness**

Simplest all-hazard all-media warning

SAMBRO

DEMO

Forest Fire Emergency Management Workflow

Objective is to demonstrate the typical workflow of SAFIRE and SAMBRO

1. Call Log of a Forest Fire
2. Create an incident report and assign a forest protection officer to assess the situation
3. Upon confirmation a Closed User Group alert is issued to all first responders and agencies
4. EOC updates incident report and action plan
 - a. task assignment, resources, and so on
 - b. then creates the first SitRep
 - c. continues to update and publish SitReps
5. After the fire is contained
 - a. EOC closes all tasks
 - b. Submits the final SitRep
6. DDM issues an All-Clear Public alert

THANK YOU

Redundant Slides

SAMBRO Research Projects

- HazInfo
 - Bridging the last-mile in community-based early warning system
- Biosurveillance
 - disease surveillance and notification, e-Health
- Voice-enabled Emergency Comms
 - Interactive Voice Response integration for alerting and incident reporting

- Nepal

Evolution of Software Versions

2004: Indian Ocean Earthquake

- Initiated by IBM's Crisis Response
- Developed by Sri Lankan Center of Humanitarian Agencies (CHA).
- Funded by Swedish International Development Agency (SIDA).

Sahana community

2005-2008: Sahana PHP deployed throughout Asia, the Americas by NGOs and govts for disaster cycle.

2009-2017: Python-based EDEN platform launches as enterprise-grade solution. Functionality expands to incorporate over 20 modules driving adoption in over 25 countries.

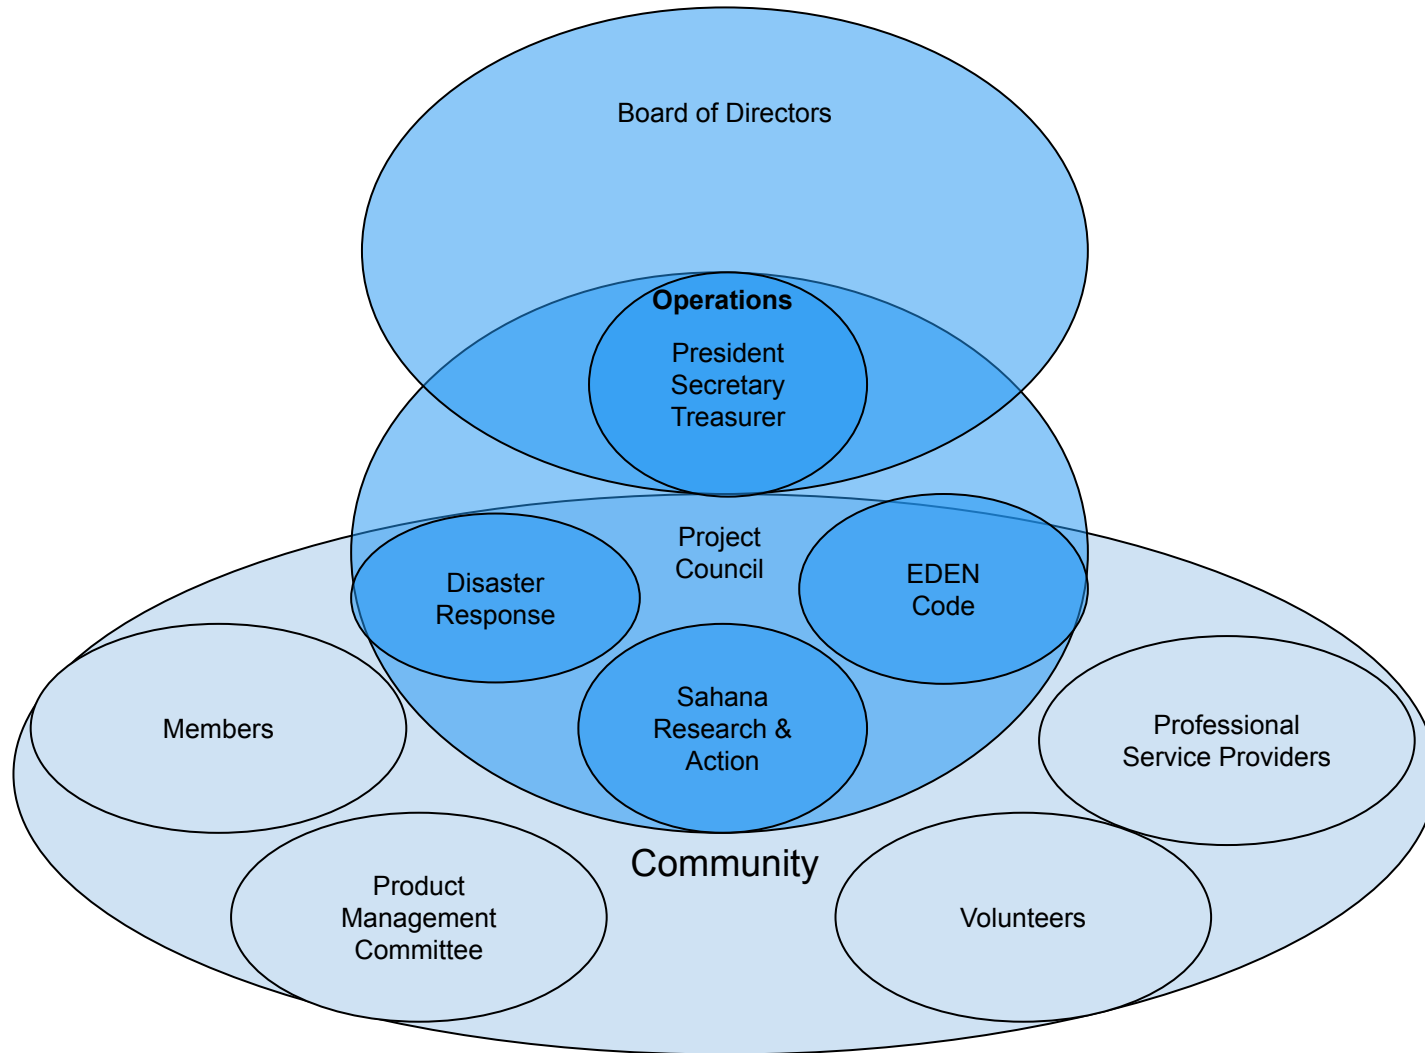

PostgreSQL

NGINX

Foundation's Operational Structure

Project Council aligns with the 3 types of deployments:

1. Response - In-situ emergency deployments to support major crises
2. Eden - Enterprise deployments institutional daily use
3. Research & Action - innovation and pilot projects

Complexity with disparate systems

Number of Channels $M = N(N-1)/2$; $O(N^2)$

Information Lost in relay and propagation

Redundant Data Collection / Sharing

Inconsistent Terminology

Manual Collation / Calculation

Delayed Situational-Awareness

Data standards, Information Communication Technology, and Situational-Awareness has proven to overcome these challenges by bring all information together onto a single platform

$N = 5$; $M = 10$

$N = 8$; $M = 28$

$N = 20$; $M = 45$

MACS & EOC
